

SiteToolSet.com Launches 702HomeFurnishings.com (www.702homefurnishings.com)

Dallas, Texas – December 3rd, 2009

It's always exciting to see a small business owner, located in Las Vegas, Nevada, expand their business to the World Wide Web. This site was developed using the user friendly content management system, Joomla. It is also powered by the VirtueMart shopping cart for the management of products, sales, shipping and tax and specials.

We worked with our client to plan the site from beginning concept through to complete launch. That included design, hosting, configuration and assisting with content loading. We also provided training on the Joomla and VirtueMart tools.

The ease of use provided by both VirtueMart shopping cart and Joomla content management system offers for easy content updates for our client. We also created a custom Monthly Specials page that integrates with VirtueMart and builds the Monthly Specials page automatically.

Contact SiteToolSet.com today to see how the Joomla & VirtueMart tools can assist your e-commerce needs.
